

Smart Roofing Solutions Superior Protection

Our Journey

What began as a vision to transform the roofing industry in India has grown into a trusted brand backed by years of technical expertise and industry insights. Today, Roofi is known not only for its superior product quality but also for its dedicated customer service, timely delivery and a well-established supply chain that reaches every corner of the country.

We work closely with builders, contractors, architects, dealers and end-users to ensure that our roofing solutions meet the needs of both modern constructions and traditional architectural styles.

Mission

To revolutionize the roofing experience in India by delivering cutting-edge, beautiful and durable solutions that protect homes and enrich lives.

Vision

To be the most admired roofing brand in India—synonymous with trust, innovation and architectural excellence.

Our Promise

Every Roofi tile installed is a promise kept—a promise of strength, style, service and satisfaction. Whether you're constructing a home, villa, resort or commercial building, choose Roofi to top your structure with confidence.

Strong Industry Experience

With years of expertise in roofing solutions, we understand market demands, material quality standards and customer expectations deeply.

Trusted Supplier Network

We maintain solid partnerships with top manufacturers and logistics providers to ensure consistent product availability.

In-House Quality Control

Every product is carefully inspected through our internal quality checks, ensuring only the best roofing sheets reach our customers.

Large Inventory Capacity

Our well-stocked warehouse and supply chain systems allow us to handle large orders with fast turnaround time.

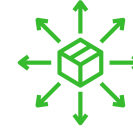

Professional Sales & Support Team

Our trained and responsive team provides personalized service, technical advice and end-to-end customer support.

Built to Last

Roof tiles are resistant to corrosion, fire, UV rays, heavy rain, wind and also decades of maintenance-free performance.

Pan-India Distribution

We serve a wide geographic area with efficient logistics and dealer networks, making reliable delivery possible anywhere in India.

Customer-Centric Approach

We prioritize long-term client relationships by offering transparency, flexible terms and dedicated after-sales service.

Competitive Pricing Strategy

Through efficient sourcing and smart operations, we offer premium roofing sheets at prices that deliver great value.

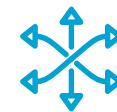

Strong Reputation & Repeat Clients

Our work ethic, reliability, and quality have earned the trust of architects, contractors and retailers, leading to high customer retention.

Adaptability & Innovation

We stay ahead of trends by introducing new designs, eco-conscious solutions and adapting to customer specific needs quickly.

Stylish and Versatile

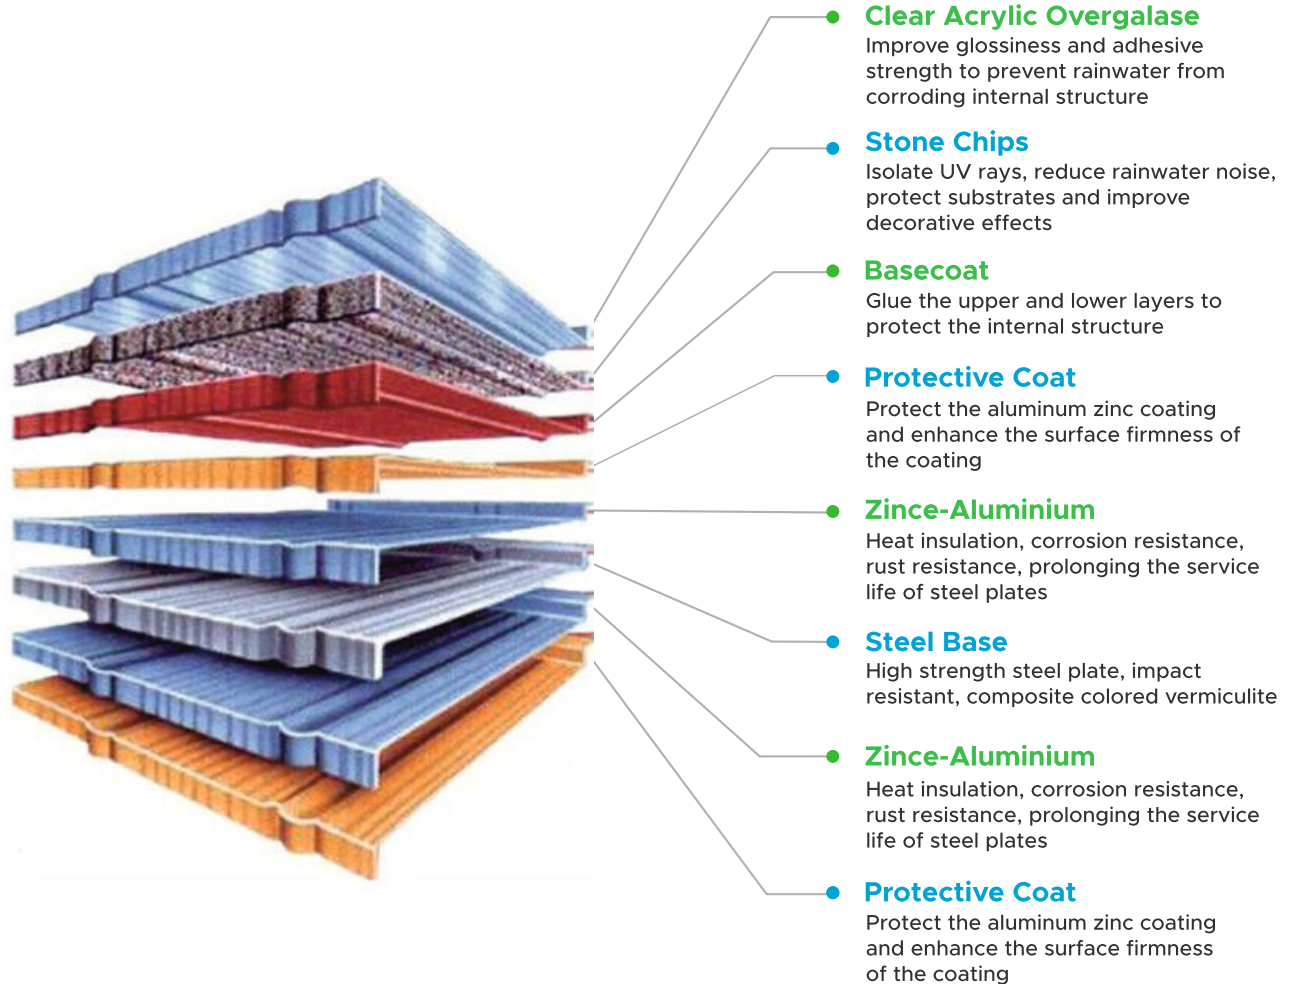

Our product range includes multiple profiles, textures and colors to suit every design preference-from classic to contemporary.

Advanced Multi-layer Technology

Stone coated roofing tiles are crafted using advanced multi-layer technology that combines the strength of steel with the beauty of natural stone. At the heart of each tile is a high-tensile galvanized or galvalume steel core, engineered for exceptional durability and flexibility. This core is coated with a state-of-the-art zinc-aluminum alloy for superior corrosion resistance.

A high-performance acrylic primer enhances adhesion, followed by a patented basecoat that securely embeds natural stone chips using advanced bonding techniques. These UV-resistant stone granules offer vibrant, long-lasting color and insulation.

The final layer-a clear acrylic overglaze-locks in protection against fading, algae and harsh weather. This cutting-edge layering system ensures unmatched performance, longevity and aesthetic appeal, making it one of the most advanced roofing solutions available today.

Premium Grade Raw Materials

Alu-Zinc Steel Coil

Roofi stone coated metal roofing comes with Alu-zinc coating of 150 grams per square meter (gsm) applied to both sides of a cold-rolled steel sheet. This coating is composed of 55% aluminum, 43.5% zinc and 1.5% silicon.

In the context of stone-coated metal roofing, Alu-Zinc 150gsm provides:

- Excellent corrosion resistance (much higher than regular galvanized steel).
- Longer lifespan in harsh climates, including coastal and high-humidity areas.
- Better heat reflection, reducing indoor temperature.
- Strong bonding surface for the acrylic base and stone granules.

This coating ensures that the steel core remains protected for decades, making it ideal for premium roofing applications.

Natural Basalt Chips (Ceramic Coated)

The coating on Roofi metal roof tiles uses natural volcanic stone sourced from New Zealand, known for its exceptional toughness and durability. This premium stone enhances protection against extreme weather conditions while giving Roofi its distinctive, vibrant appearance. Unlike synthetic alternatives, our natural stone chips retain their color for decades, ensuring that your roof maintains its beauty without fading over time.

Roofi - Elongated Tile

Size

Specification	Details
Tile Type	Long Span Stone-Coated Metal Tile
Total Length	2480 mm (8.14 feet)
Effective Length (Coverage)	2380 mm (7.81 Feet)
Total width	940 mm (3.08 Feet)
Effective Coverage Area	830 mm (2.72 Feet)
Base Steel Thickness	0.5 mm
Tile Thickness	1.25 mm (Approx.)
Weight per Tile	13 kg+ 5%
Tiles per m2	Approx. 2 tiles

Colours

Terracotta Red

Blue

Green & Black

Brown

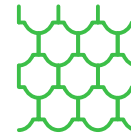

Salt & Pepper

Benefits of Long-Sized Stone-Coated Roof Tiles

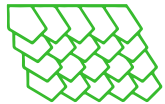

Faster Installation

Larger panel size covers more area per tile, reducing installation time and labor costs.

Uniform Appearance

Larger tiles provide a more consistent, streamlined aesthetic with minimal visual breaks.

Fewer Joints & Overlaps

Fewer tiles mean fewer seams, resulting in a cleaner look and improved water resistance.

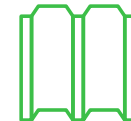

Improved Leak Protection

Longer panels reduce the number of horizontal overlaps where water might penetrate.

Enhanced Structural Strength

Long-span design improves interlocking and wind resistance, ideal for high-wind or cyclone-prone areas.

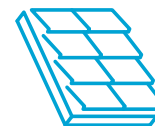

Suitable for Large Roofs

Perfect for villas, commercial buildings, and bungalows with wide roof spans.

Cost Efficient

Reduces the number of accessories and fixings required, saving on material and transportation costs.

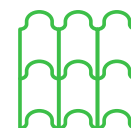

Better Alignment

Easy to align and install straight, reducing installer errors and wastage.

Lightweight Yet Strong

Despite their size, these tiles remain lightweight due to the steel core, putting less stress on the roof structure.

Modern Look

Sleek, extended design gives a premium, contemporary look to any structure.
